SKILLS

Languages
Swift, Dart, Objective-C

iOS
UIKit, SwiftUI, Auto Layout, Storyboards, XIBs, ARC, GCD, Swift Concurrency, Push Notifications, iOS Lifecycle

Flutter
Flutter, Provider, Native iOS–Flutter Integration, Native-to-Flutter Migration, Hybrid Apps

Architecture
MVVM, MVC, Clean Architecture, SOLID, Design Patterns, Modular Development

Backend & Networking
REST APIs, JSON, URLSession, Authentication, Supabase, Firebase (Auth, FCM, Firestore)

Tools
Xcode, Git, Postman, CocoaPods, Android Studio, VS Code

Engineering
Debugging, Crash Investigation, Performance Optimization, Memory Management, Code Review, App Store Deployment, Production Support

EDUCATION

BCA
Silver Oak University, Ahmedabad
2021 – 2024

12th (HSC)
Government Senior Secondary School, Partapur
2020

10th (SSC)
Sunrise Public Senior Secondary School, Partapur
2018

PROFESSIONAL SUMMARY

Senior iOS Developer with 2.5+ years of experience building, migrating, debugging and releasing production mobile apps for enterprise, business-association and residential-community platforms. Strong in Swift, UIKit, SwiftUI and Flutter, with hands-on experience in REST API integration, Firebase and Supabase, native iOS-to-Flutter migration, legacy Objective-C modernization, performance optimization and App Store deployment.

PROFESSIONAL EXPERIENCE

CHL — Ahmedabad, India

Senior iOS Developer — **Jul 2025 – Present**

- Lead development and maintenance of production native iOS and Flutter apps across MyCo, My Association and Smart Society.
- Design scalable features using Swift, UIKit, SwiftUI, Flutter, MVVM, SOLID principles and reusable, modular components.
- Migrate native iOS app functionality to Flutter while preserving existing business workflows, and integrate Flutter modules into native iOS apps.
- Integrate and maintain REST APIs, Firebase and Supabase: authentication, JSON parsing, data synchronization and error handling.
- Currently building Penalty Management, Work Allocation and My Assets modules in MyCo.
- Troubleshoot Xcode build issues, CocoaPods and dependency conflicts, linker errors, crashes, API failures and production bugs.
- Improve performance through asynchronous processing, efficient API handling and optimized UI implementation.
- Own App Store submissions, review resolution, production releases and post-release maintenance.
- Collaborate with backend, QA, product and management teams; participate in code reviews and mentor junior developers.

iOS Developer — **Jul 2024 – Jun 2025**

- Developed and maintained production iOS apps using Swift, UIKit, SwiftUI, REST APIs, Firebase and Objective-C.
- Built reusable UI components and screens with Storyboards, XIBs and Auto Layout.
- Modernized selected legacy Objective-C code into Swift, improving maintainability.
- Delivered member directories, events, notice boards, forums, notifications, documents, visitor management, complaints, polls, surveys, galleries and timelines.
- Resolved API, UI and production issues with backend and QA teams; supported App Store releases.

iOS Developer Trainee — **Feb 2024 – Jun 2024**

- Built iOS screens and reusable UI components using Swift and UIKit.
- Worked with MVC/MVVM, REST APIs, JSON, Storyboards, Xcode and Git; assisted with API integration, debugging and testing.

KEY PROJECTS

MyCo — Your Business App

Swift · UIKit · SwiftUI · Flutter · Firebase · Supabase

Enterprise platform for communication, collaboration, knowledge sharing, emergency communication and internal business workflows.

- Built production native iOS and Flutter features; migrated native screens and workflows to Flutter and integrated them with native components.
- Developed Member Directory and Intercom; currently building Penalty Management, Work Allocation and My Assets.
- Worked on Digital Notice Board, Events, Front Office, Vendor Listing, Emergency Contacts, Documents, Polls, Surveys and Internal Timeline.
- Integrated REST APIs, Firebase and Supabase; handled debugging, production support and App Store releases.

My Association

Swift · UIKit · SwiftUI · REST APIs

Approval-based association platform connecting business owners and members.

- Built iOS features and reusable UI; integrated REST APIs for authentication, member and association data.
- Worked on Member Directory, Notice Board, Events, Geo-Tagging, Vendors, Forum, Classifieds, Elections and Committee.
- Implemented approved-member registration and authentication workflows; fixed API/UI issues and supported releases.

Smart Society

Swift · UIKit · SwiftUI · REST APIs

Residential community platform for apartment residents and owners.

- Built features with Storyboards, XIBs and Auto Layout; integrated REST APIs for registration, authentication and community data.
- Worked on Parking, Chat, Courier, Visitors, Bills, Maintenance, SOS, Complaints, Elections and Gallery.
- Built API-driven dynamic UI; handled debugging, performance work and maintenance.

ADDITIONAL PROJECTS

TEF Kuwait Association

Swift · UIKit · REST APIs

Association platform for Tamil Nadu engineering alumni and professionals in Kuwait.

- Built iOS screens and reusable components; integrated REST APIs and maintained the production app.

View on App Store

SPORTTX Association

Swift · UIKit · REST APIs

Approval-based association platform for business owners and members.

- Built member, events, forums, polls, elections and committee modules; handled authentication and release support.

View on App Store

The Sun Westbank Member

Swift · UIKit · REST APIs

Member-services app giving digital access to club services and facilities.

- Built UI screens and booking functionality; integrated REST APIs, improved UI and maintained the production app.

View on App Store

Goodwill Sales

Swift · UIKit · REST APIs

Enterprise mobile platform for communication, collaboration and business processes.

- Built UI and REST API workflows; handled debugging and support.
